

CONSTRUCTION ALERT SEPTEMBER 2008

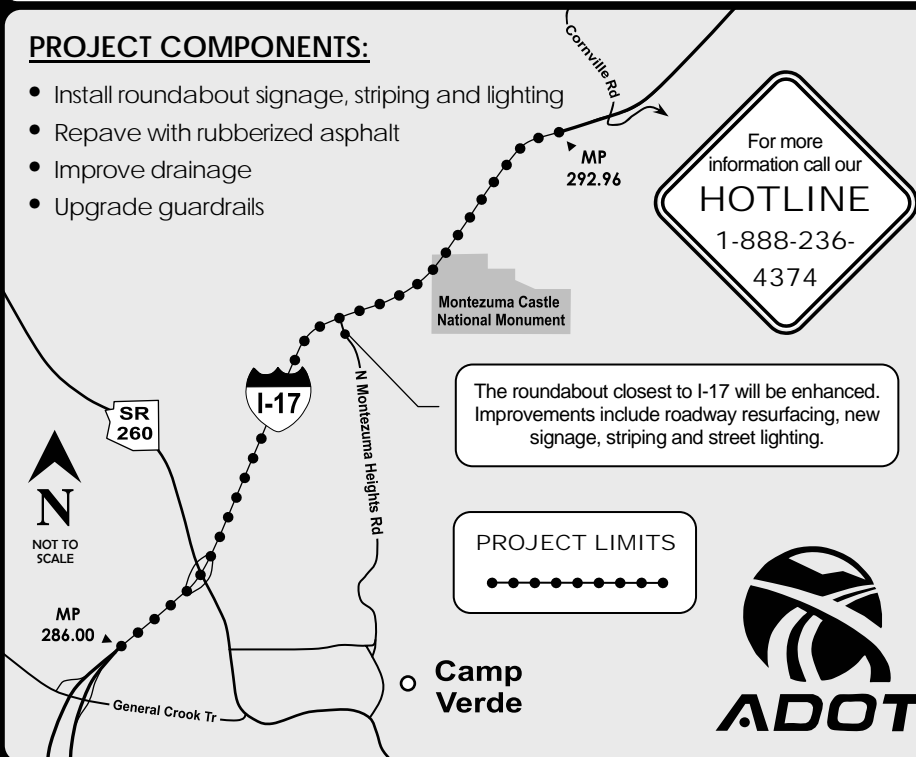

I-17 Southbound, McGuireville Traffic Interchange to General Crook Trail Traffic Interchange Improvements

The Arizona Department of Transportation (ADOT) will begin construction to improve southbound I-17 between the McGuireville Traffic Interchange (TI) and the General Crook Trail TI in early September 2008. Crews will remove the top layer of asphalt along the southbound lanes and replace it with a new layer of rubberized asphalt. Additionally, new pavement, striping and street lighting will be installed in the western-most roundabout at the Middle Verde TI. The contractor has scheduled 100 working days to complete the project.

ADOT will make every effort to keep members of the traveling public, local businesses, and residents informed of traffic impacts throughout the project. During construction motorists may experience lane restrictions, reduced speed, and rough road conditions in southbound lanes. The majority of work will be performed during nighttime hours to reduce impact to the traveling public. Please remember to use extra caution and obey posted speed limits through the construction zone.

PROJECT COMPONENTS:

- Install roundabout signage, striping and lighting
- Repave with rubberized asphalt
- Improve drainage
- Upgrade guardrails

If you have questions regarding this project, please call the toll free hotline at 1-888-236-4374 or visit the ADOT Prescott District construction Web site at www.azdot.gov/PrescottProjects.
